Relevant Medical Details

Tetanus is a serious bacterial infection that can be spread by animal bites. Given that working with us means working in close proximity to wild animals, an up to date tetanus vaccination is a mandatory requirement for all volunteers. If you are invited to join the team, it will require hands-on training, so you must ensure that your tetanus vaccination (which lasts for 10 years) is up to date. Please confirm with your GP or School (as they should have done one around year 9/10) that this is the case. This is your responsibility to do so.

Date of Last Vaccination: _____ (please do not leave this blank)

The Health and Wellbeing of our volunteers is of paramount importance to us at Tiggywinkles. Please note the following restrictions and cautions regarding working with us:

Training at Tiggywinkles involves physical exertion, including bending and lifting heavy items e.g. bags of feed, bedding material and cleaning enclosures/handling animals in cages at different heights. You sometimes need to be agile in order to avoid being injured by our patients, which are wild animals.

We provide full training regarding how to respond and handle the wild animals in our care but this does not detract from the need to be agile in order to remain safe.

Much of our work involves handling animals, feed and bedding, as well as chemical substances used to ensure our animal enclosures are kept clean. Latex gloves are therefore worn by our volunteers in order to protect their hands.

Reasonable adjustments are always considered for those who may have a medical, physical impairment, a phobia or an allergy and where our assessment is that they would be safe, practical and reasonable, we are keen to accept them.
